ABOUT MOXIE SPACE

At Moxie Space, we help our clients establish a foundation of everyday organization so they can spend more energy living their life instead of struggling with their stuff.

The name Moxie Space speaks for itself: it's a business built on the confidence to tackle any space with gumption and the idea that getting organized is possible for anyone. With this business, I wanted to create a culture based on mutual support, sharing ideas, and people who love nerding out together about systemization.

Over the years, Moxie Space has grown into a team of incredibly smart, supportive, and capable women who share a passion for helping others move past their clutter to transform their spaces — and their lives.

Our team works on projects big and small, including closets, kitchens, pantries, home offices, kids' rooms, and garages. We love creating functional, organized spaces in our clients' homes! No judgment, just results.

Happy organizing,

Sara
